

Bahaa-eddine LAMRISSI

Master's Student in Computer Systems and Networks

lam.bahae7@gmail.com | 07 13 94 75 08 | pahae.vercel.app

Lamrissi Bahaa-eddine | oPahae | Driving Licence: Category B

Professional Profile

Computer Science master's student with experience in developing web, mobile, and desktop applications. Interested in software engineering, modern architectures, and information systems, with a focus on building robust and secure solutions.

Academic and Professional Projects

Full Social Network - Next.js / React.js / MySQL August 2026 - October 2026
Personal Project
Architected and developed a full-stack social networking platform featuring real-time messaging, audio/video calls, multilingual support. Implemented an intelligent recommendation system and premium features to enhance user engagement and platform functionality.

Gym Mobile Application (Collaborative) - Flutter April 2026 – May 2026
Faculty of Sciences and Techniques of Settat
Development of a mobile application allowing the creation of sports programs, weight tracking, nutrition management, exercise tutorials consultation, and communication with coaches.

Cloud Computing & AI – Python / FastAPI / Azure November 2025 – December 2025
Faculty of Sciences and Techniques of Settat
Built a camera-based people-counting system on two Azure VMs for client-server data exchange and statistical analysis.

Project Management Application (Collaborative) - Java / Spring Boot December 2025 – January 2026
Faculty of Sciences and Techniques of Settat
Design and development of a desktop application for software project management with task management, resource tracking, team collaboration, advanced reporting, and real-time communication.

Internships

End-of-Year Internship – Intelligent Manufacturing Execution System July 2026 – August 2026
International University of Casablanca – Industrial Laboratory
Development of a web and mobile Manufacturing Execution System (MES) for industrial performance management, featuring real-time KPI monitoring, automated alerts, 8D problem-solving workflows, intelligent KPI prediction, and AI-powered recommendations.

Web Development Intern – Hotel & Tourism Platforms January 2026 – April 2026
Panorama Dades Hotel & Imperial Trail Tours
Developed two web platforms covering hotel management and tour booking, including reservation management, customer and agency tracking, online payments, invoicing, report exports, statistics, and blog management.

Final-Year Project - Global Management Platform April 2025 – June 2025
Nobough Academy
Digitization of administrative, financial, and educational tasks with collaborative study spaces.

Competitions

Belt and Road BRICS – Competition of Skills Development & Technology Innovation April 2026
Settat
Participation with a project developed in Spring Boot. Achieved **#1 place** and **gold medal**.

AISEC International Summit May 2026
Marrakech
Presentation of a project developed with Spring Boot at the AISEC International Summit.

Education and Training

Master in Computer Systems and Networks Present
Faculty of Sciences and Techniques of Settat

Bachelor in Computer Engineering October 2024 – June 2025
Faculty of Sciences and Techniques of Settat

DEUST in Maths & Computing October 2021 – June 2024
Faculty of Sciences and Techniques of Settat

High School Diploma October 2020 – June 2021
Ibno Rochd High School - Berrechid

Extracurricular Activities

WORMZ – Cybersecurity Club [2025 – 2026]
Faculty of Sciences and Techniques of Settat
Served as Technical Lead, coordinating cybersecurity activities and leading technical sessions and workshops to develop members' skills.

Technical Skills

Backend	Java JDBC, Spring Boot, Express.js, FastAPI
Web	HTML, CSS, JavaScript, PHP, Python, React.js, Next.js, TailwindCSS
Mobile	Dart, Flutter, React-Native
DevOps	Shell (Bash), Git, Nginx, Docker
Databases	MySQL, MongoDB, Firebase

Languages

Arabic (Native) • French (Professional) • English (Professional)

Interests

Bodybuilding • Martial Arts • Travel • Technologies
